Add red food colouring to one cup and blue to another (or colours you have at home) Take a few pieces of kitchen roll-roll into a tube- dip one end in one cup and the other end in the other cup (like a rainbow) Watch how the colours travel up the tissue and meet in the middle? Do they change colour? Can you experiment with other colours? Alternatively- if you do not have food colouring- mix different coloured paint (red,blue,yellow) to see how to make orange, purple and green.
